

Product Description

CAS No. 8061-52-7 (Calcium lignosulphonate).

Sales Specifications

		Test Method
Dry matter %	Min. 93.0	BRGQMS-7-921
pH (10% Solution)	4.3 ± 0.8	BRGQMS-7-919

Only active customers are notified of specification changes.

Typical Analytical Values * Chemical Data

Parameter	Unit
Calcium	6 %
Reducing sugars	8 %
Ash	16 %

Physical Data

Parameter	
Colour	Brown
Bulk density	550 - 630 kg/m ³

*The above analyses are not formal specifications, and values may change. All values calculated on solids where applicable.

Storage Stability

Borresperse Ca45 is stable for at least 4 years when stored in original packaging under dry storage conditions.

Compatibility

Lignosulfonates are compatible with anionic and non-ionic materials, dispersants, wetting agents and most organic and inorganic materials.

Packaging

Powder is packaged in 25 kg bags or 500, 600, 1000 and 1200 kg non- returnable big bags and bulk.

Lead Time

Two weeks lead time is typical.
